Catalogued & ack. August 14, 1878.

932

A small pebble found on the beach, at Sackett's Harbor, N.Y. Presented to the Museum on account of the peculiar incrustation (so called)

Presented by Hospital Steward  
Howard W. M. Harrington, U.S.A.

Received & ack. August 26, 1878.

2

933

Two series size photographic prints of Thomas Tit, a negro recruit of the 9th Cav., a native of Sierra Leone. The photograph shows the peculiar tattooing of the forehead & the filing of the upper incisors common to the native tribes of that region. The tattooing is a vertical streak 5 in long & 1/4 in wide, extending from the root of the hair, commencing the upper portion of the forehead to the root of the nose, & is performed with a pen knife by pricking into the skin a peculiar indigineous gum of that country. The peculiar pointing of the upper incisors is performed by removing the lateral edge with a small chisel and hammer and then filing them so as to make the teeth project to a fine point.

Presented by Capt. Jurg, Carlos Carrallos,  
U.S. Army.

Received & ack. August 28, 1878.

934

Stone hammer, from near Fork Hisselton, D.T.

Presented by Hospital Steward  
August Geck, U.S. Army.

Received and acknowledged  
Sept. 4, 1878.

935

Pipe of a Wahpeton Sioux Indian Medicine Man. The bowl is stone inlaid with metal and stone or wax designs; the stem of wood, twenty-seven inches long, ornamented with beads, ribbons and feathers.

Presented by Hospital Steward  
August Geck, U.S. Army.

Received and acknowledged  
Sept. 4, 1878.

936

A stone implement or ornament, probably, of Indian manufacture. This specimen was found in ploughing a field about one half mile west of Madison Barracks, Sackett's Harbor, New York.
